ABOUT THE INSTITUTE

Al-Falah School of Engineering & Technology (AFSET) is an autonomous Muslim minority institution. Being one of the oldest private engineering institutes in Haryana, the Institute offers unique modular pattern of education in various branches of Engineering & Technology. The study programmes include various courses at Degree, M.Tech & Ph. D. levels. Its various programmes are accredited by NBA. It caters to the technical manpower requirements at various levels by adopting a new concept of modular system in imparting technical education with emphasis on industrial training.

About The Department

The Department of Computer Science Engineering is the premier department of AFSET. The courses of Department are NBA accredited. The objective of the department is to provide quality education, training and expertise so as to improve the quality of life by improving the capabilities of human resources, thinking process practice & performance in the engineering discipline, we have chosen. Since its inception in 1997, the department is committed to provide the excellent learning opportunities and extended the boundaries of knowledge by engaging in research activities. The department is engaged in different research areas such as Data mining, Mobile and Adhoc Networks, Fuzzy Logic, Artificial Intelligence, Software Engineering.

Location

The Institute is located at village Dhauj in Faridabad which is about 20 Kms from Delhi (Badarpur border). College bus facility is available from all main locations from New Delhi, Faridabad and Palwal. The nearest airport is New Delhi.

ABOUT THE CONFERENCE

Nowadays, frequent changes in the technology impact our everyday life. Our objective is to organize a conference is to provide a forum for discussing the development, implementation, use and application of emerging technologies. This conference has been proposed with an

aim to help all the faculty members as well as the building engineers/scientists to upgrade their knowledge and enhanced their confidence in interacting with experts of the field.

The conference will provide the participants an opportunity for developing interaction with academia from other institutes of high academic standards, and people from renowned industries. This eventually will open opportunities to collaborate with other universities and institutes, and also to foster synergic partnership between industry & engineering education institutions and other agencies.
